

Why Rainwater Tanks?

Australia is a dry country, with a large percentage of the population living close to the coastline in urban developments.

Rainwater tanks are a critical component of urban water management systems for collection and use of rainwater where it falls, keeping more water in dam storages and helping to better manage stormwater.

There is much more rainfall close to the coast, making our roofs ideal catchments for this precious resource.

Installing a rainwater tank has the potential to reduce residential fresh water requirements by 50% and contribute to more effective use of precious water resources. Rainwater is generally considered to be safe and ideal for washing clothes, flushing toilets and washing cars.

It consumes much less energy and generates less greenhouse gases than recycled or desalinated water, as it simply falls into the tank, does not usually require treatment and small pumps are used only when the water is required.

Why Choose Steel?

AQUAPLATE® steel tanks, with the iconic corrugated profile, are stylish, durable and will not burn. With more than 20 years of proven operation in Australian conditions, they are a trusted performer.

The strong Australian sunlight will not soften or degrade them and as light cannot penetrate their exterior shell, water quality is optimised with reduced algae growth.

WATERPOINT® tanks are made from food-grade approved polymer coated AQUAPLATE® steel complying with tough Australian Standards.

Tanks made from AQUAPLATE® steel are environmentally responsible, as steel is one of the most recycled materials on Earth and can be recycled even after many years of use.

About BlueScope Water

BlueScope Water is the leading manufacturer of AQUAPLATE® steel rainwater tanks in Australia, with manufacturing locations in Brisbane, Sydney and Melbourne.

Our attractive range of WATERPOINT SLIMLINE® and WATERPOINT CLASSIC® tanks are complemented by a range of quality pumps and accessories, all supported by our no-fuss service and expert team.

We've been manufacturing rainwater tanks for more than 20 years, backed by BlueScope Steel's many years of experience supplying steel-based solutions.

About BlueScope Steel

BlueScope Steel is the leading steel company in Australia and New Zealand. The company's products play a big part in people's everyday lives, being vital components in suburban houses, landmark buildings and structures and popular makes of cars.

The brands of BlueScope Steel are market leaders in Australia and include COLORBOND® steel for roofing, walling and fencing, ZINCALUME® steel for a range of building products, TRUECORE® steel for steel house frames and AQUAPLATE® steel for rainwater tanks.
